

ASE Green T8 LED Dark Cycle Work Light

18W 517-525NM Hybrid Compatible

- Sleep Work Lighting
- Green Screen Filming and Photography Lighting
- Pharmaceutical Facility Germ Retardant Lighting

Hybrid-Compatible With or Without Ballast

- UL Type A + Type B listed. This T8 LED directly replaces traditional fluorescent lamps without making any changes to the fixture or wiring. It will also work without any ballast using direct Line power to single end (ballast bypass).

Good Retrofit Choice

- This specially designed 517nm-525nm Green color LED allows plants to remain undisturbed in their dark/sleep cycle while the workers can still see to work in the grow facilities.
- The Green color LED is also germ retardant keeping germs and bacteria from receiving any life supporting normal full color spectrum light. This helps keep Pharmaceutical facilities germ free. They cannot survive in the green light.

Oval Design

- Oval tube made of half aluminum and half PC lens allowing excellent heat dissipation..

Warranty: 5 years

Rated Life: 50,000Hrs

Installation Guide (Type A + Type B)

Type A-Installation Steps

Type A-Principle of Wire Circle

Green T8 Tube for Plant Sleep Lights Pharmaceutical Facility Germ Retardant Lighting

Input Voltage: AC100-277V 50/60Hz

⚠️ Switch off power supply BEFORE COMMENCING WORK

Remove diffuser (if applicable) and fluorescent lamp. Cut off all wires connected to the ballast.

Install LED tube, connecting the side with "AC Input" label into the holder with L, N wires. Pay attention to the direction.

More information about product's installation, please contact our service person for INSTALLATION & SPECIFICATION GUIDE.
